## REPORT OF SCHOOL BOARD.

---

The School Board hereby submits the following brief report for the year ending February 15, 1906:

The school year included 28 weeks, as follows: Spring term, 11 weeks; fall term, 12 weeks; winter term, 5 weeks.

The spring term of eleven weeks commenced April 17th, with a total attendance of 156 pupils. In a few of the districts but five or six pupils were enrolled—so few that they might profitably have been conveyed to more populous districts were it not for the fact that parents as a rule prefer to forego the advantages their children would derive from attending a larger and better equipped school.

It is universally admitted that the pupil classed by himself, and this is the case in most of the small schools alluded to, is cut off from that stimulus, that good natured rivalry, so much in evidence in the larger classes. Of course some progress is made by the child compelled to wander alone the hard paths of knowledge, but almost invariably he exhibits little interest and no ambition in his studies. Again, these small schools are the most expensive schools for the town to maintain. The expense incurred in supporting the larger schools as, for instance, the Centre, Parade and South, will average about seven cents per day for each pupil enrolled, while in the small schools of five or six pupils the cost is between twenty and twenty-two cents.

Early in the year the board went carefully over the books and supplies and sorted out such as were no longer serviceable. Among these were the antiquated grammars and copy-

books which were replaced by modern practical text books. An effort was also made to revive the old-time interest in penmanship, and to this end the teachers were notified that a prize of five dollars would be awarded the pupil making the greatest improvement in writing during the year. The result of this offer was very gratifying, each school showing a decided improvement over the previous year.

The Board at this time also held an examination for teachers, and although but eight responded, six of these passed satisfactorily. It may not be generally known that these examinations and certifications of school teachers are required by the laws of New Hampshire. Notwithstanding the custom in the past to treat these laws lightly, we believe that they should be rigidly enforced and that, so far as possible, no teacher should be employed who has failed in these examinations, or has signified his unwillingness to take them. The general efficiency of the town schools would be materially increased—first, by employing only experienced teachers (normal school graduates or those who have taught one or more successful terms); second, by a uniform system in teaching in which an approved daily program of the subjects taught and the time to be devoted to each subject shall be assiduously followed; and third, by a few general rules applicable to the teachers.

While many reforms are yet needed, the past year on the whole has been an improvement over previous years. It cannot be expected that every teacher employed and every term taught will be looked upon by all people as a complete success. It would not be human nature. The best teachers are often woefully handicapped by the prejudices of parents, based almost wholly upon the statements of children. The schools of Barnstead will be no better nor worse than the citizens of the town are determined to have them. This applies not only to your attitude toward the individual teacher

but also to what you will or will not do for the schools in general.

The appropriations made for school purposes in the past would not permit the payment of more than from 5 to 7 dollars per week for teachers, while the school year was necessarily short. As a result the surrounding towns have too often taken our best teachers at a higher salary, while our applications to the state superintendent and various normal schools have been returned with "Do not know of any one wishing to teach for that salary."

We earnestly urge an increased appropriation, that the educational advantages of Barnstead may not be behind those of other towns.

Respectfully submitted,
